

# Endri Dobrovoda

for Division I Vice President

## “Building Blocks”

Hello, my name is Endri and I was born in Italy from an Albanian family. I moved in the US when I was 18 where I finished high school and started my journey in higher education at Bergen Community College. My passion is engineering, and I hope to become a mechanical engineer in the motorsport industry where I'll be able to work on projects about renewable energy in car racing; increasing my knowledge about another passion that is nature and our planet.

Another passion that I discovered during college is academia, which has given me so much and had made me look at education in different prospective, making me consider the option of having a parallel career in which I wouldn't leave after graduating. As I'm a very math guy, I would like to teach math and keep being involved in researches as I've done during my undergraduate journey so far.

My journey in education have been hard at times, making me doubt about myself and my future; which is something that my college and PTK had helped me with. This has made me want to become an advocate for students that had economical, immigrational and any type of social difficulties that had stopped them from their academic journey.

## Let's connect

edobrovoda@me.bergen.edu

Middle State Region - Alpha Epsilon Phi - Bergen Community College - Paramus, NJ

# Leadership

- PTK Chapter President
- PTK Edge Completion
- PTK Director of Communications
- Honors in Action Researcher and Coordinator
- College Project Organizer and Speaker
- PTK Induction Ceremony Speaker

# Fellowship

- MSR Conference '25
- MSR Leads to Legends Conference '25
- MSR Fall Leadership '25
- Alumni Academy

When building up our careers, achievements and even personalities we first need to start from the foundations. Start small and build your future brick by brick!!!

# Scholarship

- Dr. Richard Ciccone Scholarship recipient
- PTK Scholarship Cafe Advising
- Bergen Scholarship Gala Student Ambassador

# Service

- Math and Science Tutor
- STEM Researcher
- Juniper Senior Village Volunteer
- PTK Donation Drives
- PTK Info Table

LEGO has been my favorite board game ever, and even the first one I had to play as a kid. This game has definitely influenced my passions such as engineering, but it has also made me realize how to live a life that it's worth living, building it brick by brick everyday.
